Climate Resilience

Social Levelling

Health & Well-being

Forward Planning

# Parish Online mapping

Started in 2009 for England and Wales

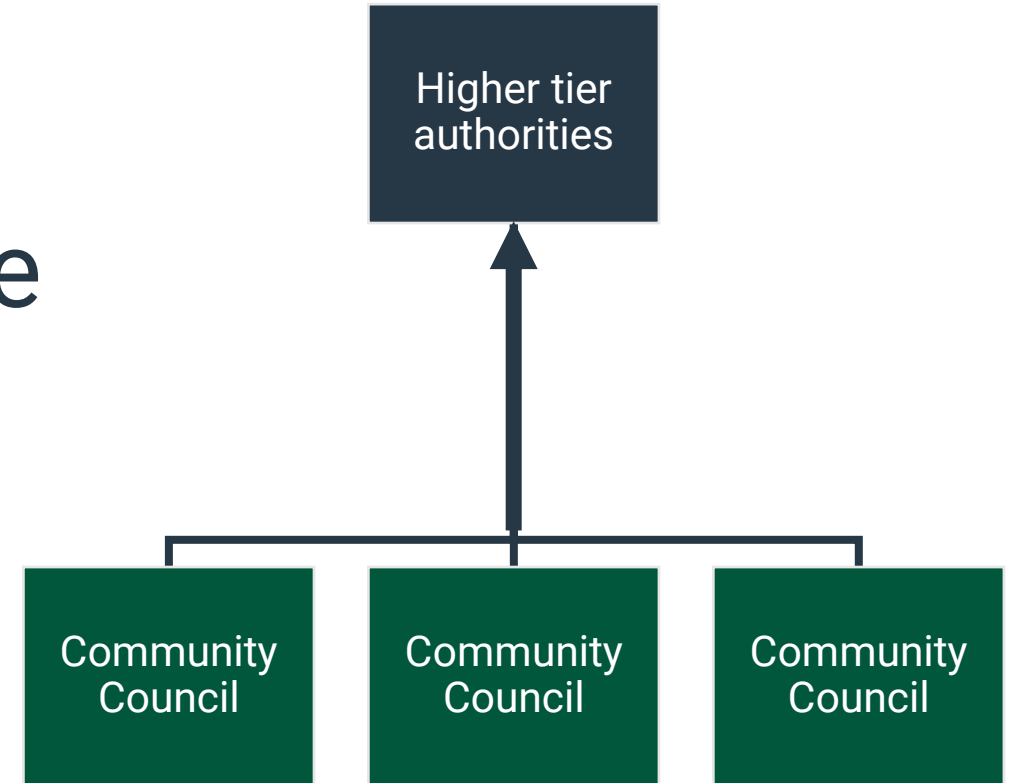

2,500+ subscribers

Helps improve continuity and aids  
decision-making in their day-to-day tasks

# Harnessing Local Knowledge

Communities have the best local knowledge  
but the most informal & underfunded IT

# Real change happens locally

Communities taking ownership is the catalyst for making positive changes throughout all tiers of Government

**Parish**  **Online**  
mapping

Take our tried-and-tested software and rework it for Scotland

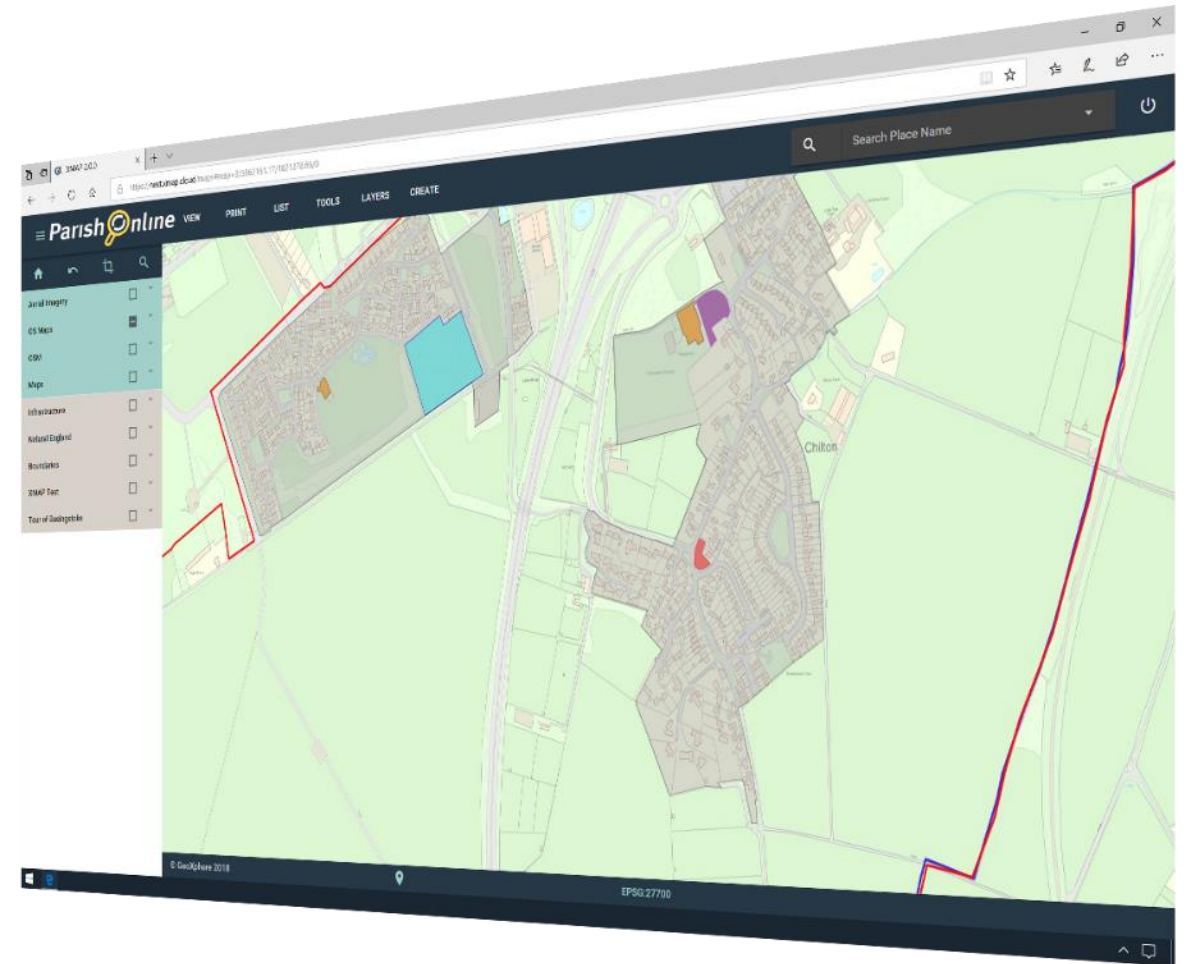

# ParishOnline mapping

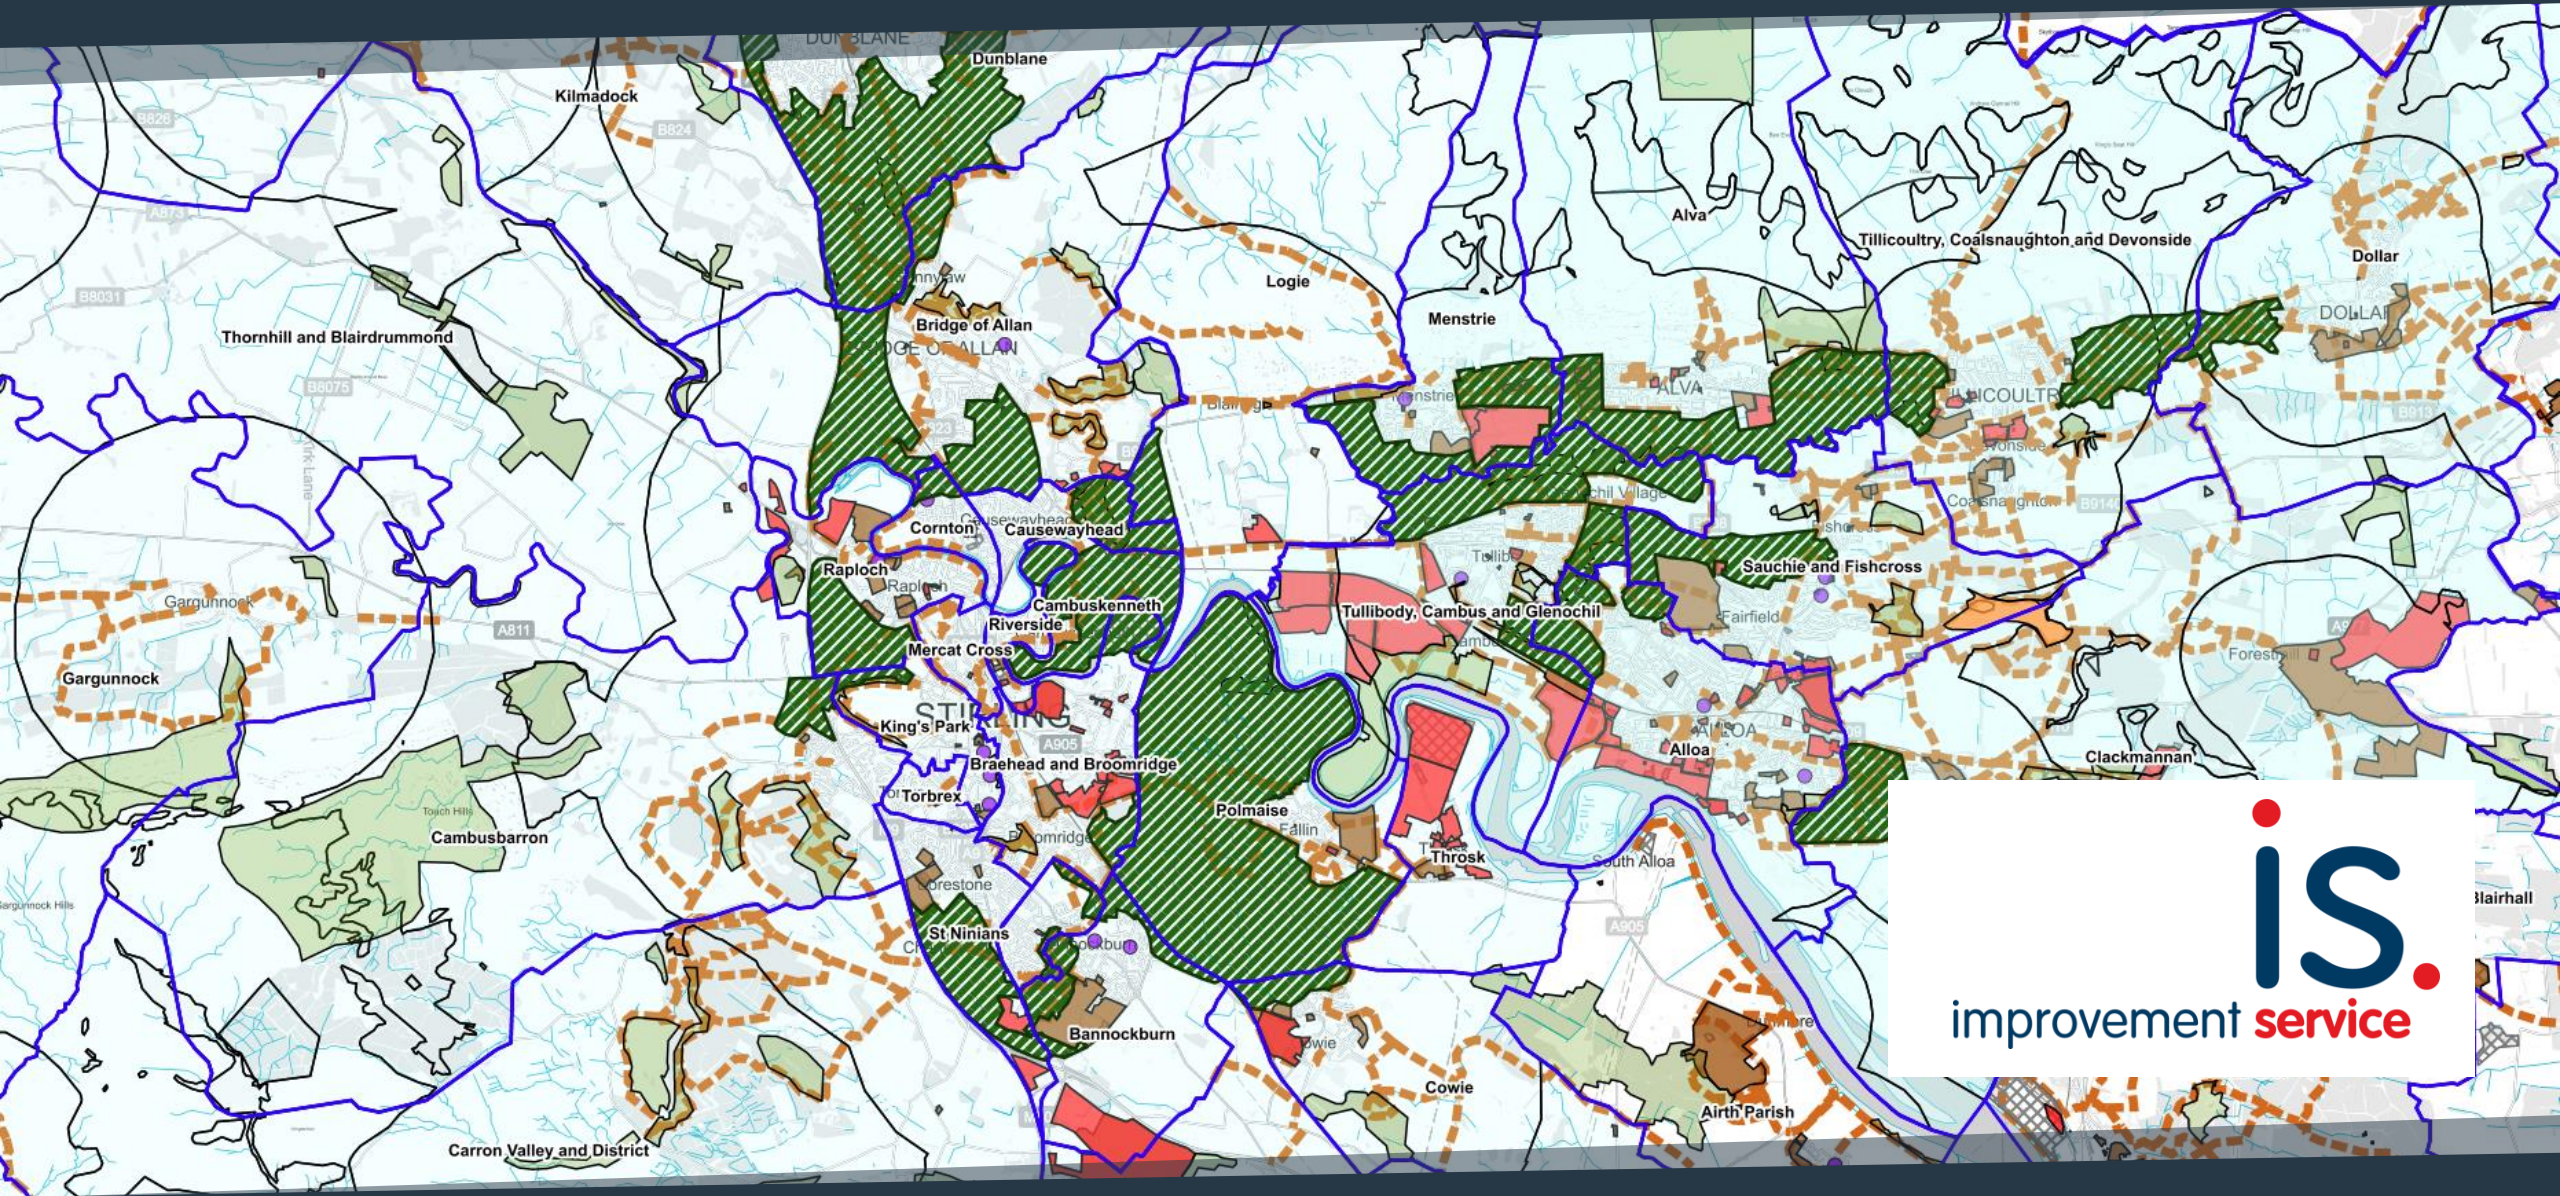

a self-service mapping portal that helps you access digital mapping to use for your council business

No software to install

Secure & encrypted

Affordable subscription service

Curated data from the IS Spatial Hub

PAS leading on training and advice

# Easy editing tools

Pre-built layers & styles

Consistency across councils

Snapping for enhanced quality

Instant save to cloud

# Collaborate layers

Build up a national picture amongst communities and other tiers of Government

Creates more dynamic and accurate datasets to tackle ever-evolving issues

# Active travel tool

Isochrone tool for real-world travel times

How far can I get?

What's my catchment?

# Publishing

Export to PDF and image

Create shareable links

Create interactive maps

Let's get started!  
Search for your Town, Parish or Community Council.

tilt

- Tilton on the Hill and Halstead CP  
Harborough
- Tilty CP  
Uttlesford
- Stilton CP  
Huntingdonshire

Select how you want to Sign-Up

### Start a 30 Day Free Trial

Try the fully-featured Parish Online and keep your data if you carry on with a full subscription.

Once your trial has ended you have the option to switch to a full subscription or even take advantage of a BHIB-funded subscription.

# PSGA

**(Public Sector Geospatial Agreement)**

Central Government-funded scheme to give  
Local Councils a licence to use detailed  
national mapping data

Free to register and free to use for your Local  
Council business

[os.uk/psga](https://os.uk/psga)

From this...

**APGB**

**(Aerial Photography Great Britain)**

Once you've added a PSGA number you can register for this within Parish Online

Again, completely free for your Local Council

Sign member licence within Parish Online

From this...

# Great initial feedback

Hundreds joining our last introductory session

Fantastic support from IS and PAS

Communities signing up every day

Network of enthusiastic organisations growing

# Next steps

Can we foster more engagement from Local Authorities and Central Government?

Can we find funding & support in the next 12 months?

Excited to see what Communities can achieve with the power of mapping

# FAQs

If an individual signs up for a Community Council, can it transfer to others?

Yes, these are Community Council accounts rather than being tied to an individual.

Can I publish maps on our website or distribute to the public?

Yes, with caveats.

Adhere to the PSGA licencing. Use it for CC business only.

Don't sell the maps.

# FAQs

**Can the Local Authority share their Local Plan to use as context?**

Yes, ask them and they can share their GIS data to us. We'll then share it to all CCs in their area.

**Can I see land ownership?**

That's something we're going to try and add. I'll most likely be limited to seeing what's freehold/leasehold/unregistered etc.

# FAQs

Do you sell the data we add in?

No, we're not interested in selling your data. We also don't share it externally.

Can you add XXXXX layer from organisation YYYYYY?

Hopefully! If you think you'll find it useful for your work we'll try and add it in.

Email Improvement Service.

# FAQs

**Do I need to use the OS Data Hub to get the mapping into my account?**

No, we've done all that for you. You just need to add your PSGA licence number to your account.

**What if I see data that is wrong?**

Contact the owner of the data directly. Send them a PDF of the area in question. That'll help them fix it quickly.

# FAQs

**If we create a LPP, will it be ignored by the planning authority?**

We hope not! We've heard positive things so far, but it'll take momentum for Community Councils to make their voice heard.

**Do I have to use this software?**

No, not at all. This is purely opt-in. We hope you'll join in the project.

# Thank you
